

PATCHETT HEN FOLD

Fully furnished Hen Fold System.

A house for up to 6 laying hens supplied with feed hopper, drinker, perch & nest, providing regular access to good pasture, natural light and fresh air.

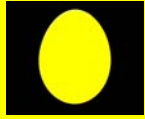

Worried about foxes, mink and other predators?

With this house your hens can be kept safe.

- * **Supplied in flat pack with assembly instructions, requiring only a screwdriver to put together.**
- * **The house weighs about 50 Kg, is very rigid, so each end can be lifted easily, enabling one person to move the house sideways about 1 m. every day, or as often as required, to give the hens fresh grass in the run area.**
- * **Easy access through the 2 doors, especially for egg collection.**
- * **The wire floor in the closed area is 5 cm. x 2.5 cm. x 2 mm. mesh size, designed for bird comfort and makes for a clean environment for the hens**
- * **The vertical side boards give wind protection for the birds in the run.**
- * **Removable perch.**
- * **The cord operated pop hole door enables the birds to be shut in the covered area at night, if required, or to be shut in either end during maintenance.**
- * **Unbreakable plastic wall drinker supplied. Easy to clean and fill and keeps much cleaner than a floor- level drinker.**
- * **Optional wire base for run. This results in cleaner eggs and makes the unit more secure.**
- * **Supplied untreated.**
- * **Parts hand assembled at Ryefield Works where the Patchett family has carried out joinery work for over two centuries. The company has been making poultry housing since 1936.**
- * **Adaptable for other types of poultry.**
